# CATALOGUE OF ICT SUPPLIERS

Expertise. Services. Values

## About ICT in Moldova

Moldova is a country situated in South-Eastern Europe, bordered by Ukraine in the North, East and South, and Romania in the West. Our country has a 3,5 million population and is an emerging IT nearshoring and offshoring destination while leading in the telecommunication sector.

Moldova is a competitive provider of professional companies, which are global leaders in software development. The country offers teams of highly skilled specialists ready to ensure the best use of technology. The ICT industry employs over **30 000 professionals, with about 16 000 professionals in IT.**

Well over 80% are technical specialists, including software engineers, business analysts, QAs and testers, developers, product and project managers.

With a significantly growing economy and an average annual growth of GDP, Moldova perceives to penetrate foreign markets by implementing liberal trade regimes, power of reforming, and IT Parks fiscal regime. The ICT industry is the most dynamic economic sector in Moldova, registering about **2 300 ICT companies.**

Companies investing or outsourcing in Moldova have tremendous economic potential to embrace, lead and transform their businesses.

This Catalogue is a perfect tool for anyone looking to discover the Moldovan ICT market and companies. It is also intended to assist companies in their search for a partner to enhance their business's digital presence and automate processes. Search descriptions, feedback, and awards to find which can best suit your company's needs.

**The Moldovan Association of ICT Companies (ATIC)** is the business Organization uniting more than 80 entities, that gathered represent over 9 000 employees. ATIC's mission is to promote the development of the ICT sector in the Republic of Moldova.

Moldovan ICT Companies deliver solutions to global corporations as Adobe, S&T, Ericsson, Microsoft, Orange, Endava, Stefanini Group, etc.

The leading ICT companies have joined the Moldova IT Park - a virtual place where IT companies pay a 7% unique tax on turnover covering the corporate income tax, social security, medical insurance, etc.

Internet in Moldova is one of the fastest and least expensive in the world. The country ranks 3rd in the world by gigabit coverage with around 90% of the population having the option to subscribe to a gigabit plan.

IT companies in Moldova are handling projects with values ranging from 20 000 \$ to \$3 million, with lifecycles spanning one month to five years.

During 2015 - 2019, the IT industry recorded an increase of more than 3 times the annual sales revenue. In 2020 the value of IT services exports increased by 23,2% compared to 2019, reaching 258,47 million USD.

**AGILE PARTNERS**

Agile Partners is a people and technology platform developing bespoke global FinTech products for its clients, founded in 2016 by Gary Palmer, with a stake held by Transcard (US Processing company). Following the People + Tech + Regulated Entity paradigm championed by founder and payment industry pioneer Gary Palmer, we serve as the bridge between FinTech companies, looking to build their product, and the Regulated Entities and 3rd Party providers they need to connect to, through People and Technology – building and reimagining capabilities. Bringing together exceptional industry insight and knowledge, paired with an eye for detail, and a strive for perfection we create, ideate, design, build, launch and operate FinTech products for Businesses, Banks, and Individuals, delivered via APIs, Web, and Mobile apps, as well as embedded solutions.

**General:**

We manage the full life cycle of products, from concept to launch and operation, ensuring compliance and support every step of the way. To delight our customers, we can do and offer as much, or as little, as they desire and to ensure they exceed their objectives in ways they could not without our team. In this team, everyone holds themselves accountable for their actions.

CODE FACTORY

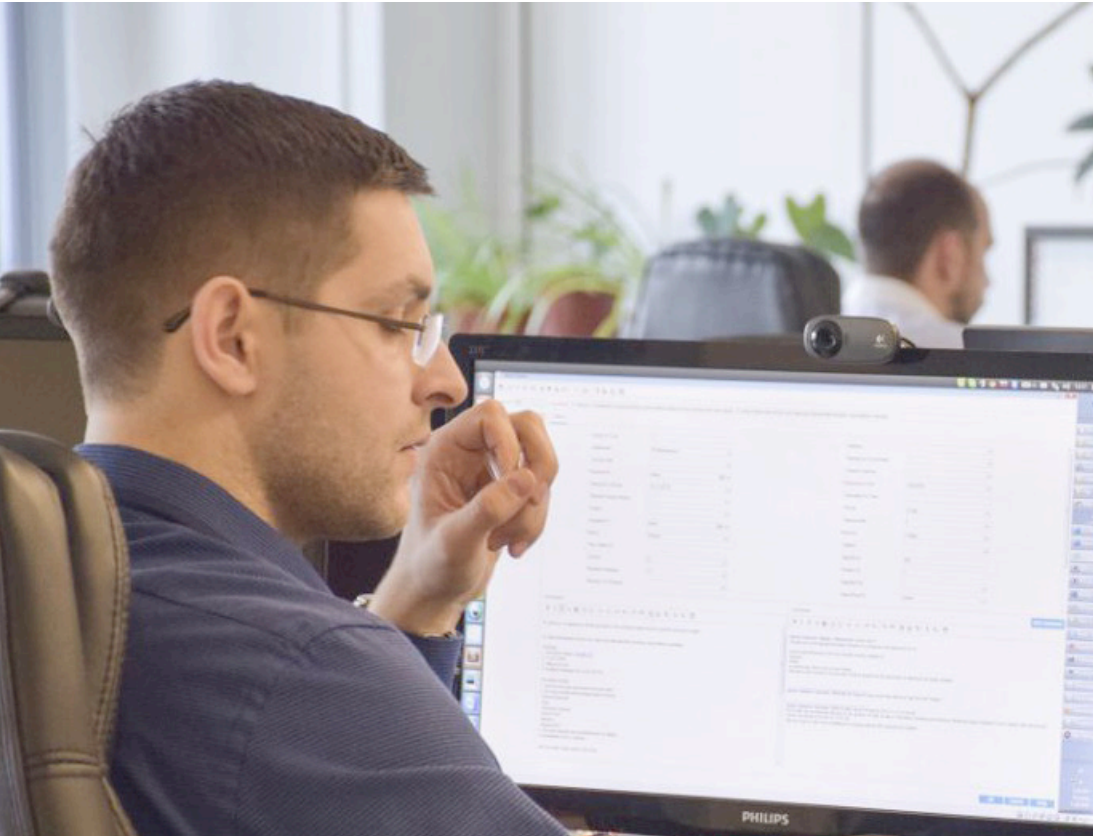

Code Factory is an independent, global, custom software development and quality assurance services company. We have been operating successfully since 2004; we have a portfolio of over 300 projects already developed and employ more than 180 specialized and certified testers and software developers. Our software delivery facilities are located in Moldova (Chisinau) and Romania (Bucharest), which, in the last five years, have consistently featured as one of the top 10 shoring locations in the world. Our links to universities in each of these locations give us access to top IT talent thereby enabling us to provide you highly skilled developers at a competitive cost. We also have a local presence in Ireland and UK and service clients in many countries including the UK, USA, Canada, Norway, Sweden, the Netherlands or Austria.

Our main services: 1). Custom Application Development (Mobile and Web based) We master all the leading programming technologies (.NET, Java; PHP; JavaScript), mobile and cross platform platforms (Android; iOS; ReactNative; Xamarin) so we can provide you with the best technical solution to fit your needs. We can also provide you with consultants in niche technologies such as big data type of technologies (Apache Spark, Hadoop) or programming languages such as Python; Ruby and Scala. 2). Independent QA and Testing Our specialist testing team provides expert services and tools for independent product and application testing, as well as QA checks of our own custom solutions. Using Open source tools (Selenium, FitNesse, JMeter, SoapUI, Jbehave, Test Link etc.) and Industry standard tools (ie. HP QC, UFT, LoadRunner, IBM Rational Functional Tester, SOASTA CloudTeststreet,street, etc.) We are specialized in test automation, performance testing, agile testing, mobile testing, and game testing.

Noction is a privately funded technology company, founded in 2011, with offices in the US, Europe, and Asia. The company develops, markets, and sells cutting-edge network intelligence and optimization products, enabling organizations of all sizes to take full advantage of maximum network performance for their business-critical applications such as e-commerce, VoIP, and media streaming across IP networks. Noction products help IT professionals keep a close eye on their networks, proactively find, diagnose and fix network related issues, detect traffic anomalies and threats, minimize latency and packet loss, avoid congestions, intelligently manage bandwidth, balance traffic, and a lot more.

**General:**  
Noction provides Internet route optimization and network traffic analysis solutions for hosting providers, telecom companies, Managed Service Providers and other enterprises that run multiple ISP connections. ATIC member.

**Fields of activity:**

Telecommunications; Software Engineering;  
Networking and Internet Technology.

**Technologies:**

BGP, TCP/IP, NetFlow, sFlow, C++, PHP, Javascript

**Industries:**

Telecommunication; Software Development;  
Data Centers; Hosting;  
Managed Services; Research and Education;  
Healthcare; Banking and Finance;  
E-Commerce; Media Streaming.

**Products:**

1. Noction Intelligent Routing Platform is a complete BGP automation platform for multihomed organizations, designed to dramatically improve network performance. IRP leverages the company's existing infrastructure to deliver substantial network performance improvements, optimizes existing Internet connectivity, and reduces the cost of operating the network. The platform improves network performance by 30%-50% on average, reduces network latency by up to 50%, and increases network availability to 100%.
2. Noction Flow Analyzer is a flow-based monitoring and reporting software that collects, stores and presents traffic data across the entire network and protocols to network professionals for future analysis. The product enables engineers to optimize their networks and applications performance, control bandwidth utilization, better capacity planning, perform detailed BGP peering analysis, improve security and minimize network incidents response time. The system appeals to networks of all sizes, types, and complexity.

**Partners of & Certifications:**

Dedicated software development teams:  
IT staff augmentation;  
Custom software development;  
Web development;  
Mobile development;

SALT EDGE

Connecting banks with businesses has never been easier. Salt Edge, a fintech leader in creating and providing open banking solutions, takes intercommunication and interoperability between banks, third-party service providers, and their end-users to a whole new level. With offices in Toronto, London, Chisinau, Milan, Bucharest and in continuous expansion, Salt Edge is AISP (account information service provider) licensed under the UK's FCA. The main vectors we are focusing on are:

1. Open Banking Gateway - allows lenders, accounting softwares, banks to get instant access to all customers' bank accounts in Europe, APAC, and Americas for account information and/or payment initiation, via one unified API. Salt Edge Open Banking Gateway includes useful data enrichment tools (transaction categorization, merchant identification, financial insights), which help in conducting a detailed and real-time analysis of the end-user's financial behavior, for smarter and faster business decisions.

2. Open Banking and PSD2 Compliance Solution - enables banks and eWallets to become compliant with PSD2 and Open Banking requirements in as little as one month, with minimal resources. To date, Salt Edge offers connections to over 5.000 banks in 50+ countries, bringing comprehensive financial data to more than 1.000.000 end-users monthly. ISO 27001 certified, the company employs the highest international security measures to ensure stable and reliable connections between financial institutions and their customers.

**General:**  
Fintech company, ATIC member

**Fields of activity:**

Financial technology services, Open Banking, bank data aggregation, financial data enrichment, payment initiation, PSD2 compliance, strong customer authentication

**Industries:**

Banking;  
Payment;  
Lending;  
E-Wallet;  
Personal Finance Management.

**Markets:**

EMEA, APAC, NA

**Products:**

PSD2 Compliance Solution: helping banks and e-wallets become compliant with PSD2 in a matter of months;  
Open Banking Gateway: integrating with banks' channels for account information and payment initiation purposes, based on end-user's consent;  
Salt Edge Authenticator: a mobile application for customers' strong authentication and for authorizing actions. The solution is implemented by banks and other financial services providers.

Moldcell is a digital operator with innovation in its DNA. The strategy is built on bringing the best digital experience to its customers, the fact recognized by the “Online Business” award within Brand of the Year 2021. Moldcell started its operations in Moldova in April 2000 and has launched a new phase in the development of the mobile communication sector in Moldova. Moldcell is part of the international group CGCorpGlobal comprising 167 companies in various industries, covering 79 brands and having over 13,000 employees. Moldcell dares to bring the benefits of innovation to over 1 million customers in Moldova. In 2021 Moldcell got the highest recognition of it by being awarded with the Reputation and Trust Golden Mercury statuette within Brand of the Year Sharing the belief that Moldovan people deserve the best in class access to technology, devices, and customer care, a dedicated team of over 400 employees delivers the most comfortable and cost-efficient communication solutions. Moldcell 2G network covers 97.36 % of the country’s population, 3G network has 98.24% population coverage and 4G networks – 90.25% population coverage. Moldcell is continuing its investment efforts on developing its 4G network. Since mid-2013, Moldcell became a leader in terms of mobile number portability and secured its position up to this date, over 60% from the general port-in rate. In 2013, the GSM Association (GSMA) awarded the Moldovan government the “Best mGovernment” trophy for the best performance in the mobile communication sector, and namely for the successful implementation of the m-signature project. The project was implemented in partnership with Moldcell and other mobile service providers in the Moldovan market. In 2021 another technological breakthrough implemented for the Moldovan market being a pioneer in E-SIM technology.

The sustainable way of thinking and acting on the market is integrated into Moldcell day to day activity, while the Responsible Business concept implemented in Moldcell and its ecosystem has been awarded Integrity Trophy within the Brand of the Year 2020 and Brand of the Year 2021. Moldcell is one of the benchmarks in the country when it comes to Corporate Social Responsibility and Sustainability. The Company has initiated and supported hundreds of social development projects and has recently launched Moldcell Foundation that was the only entity to be awarded with the Debut of the Year award within Brand of the Year 2021.”. Moldcell is the first private company in Moldova to sign UN SDGs that was recognized on a state level by the award within Brand of the Year 2021.

MOLDTELECOM

Moldtelecom is the national telecommunications operator in Moldova. Incorporated on April 1st, 1993, has evolved with great efforts, but smartly, from a traditional state-owned company to an innovative and socially responsible company. Moldtelecom has demonstrated its competitiveness in the telecommunications market of the Republic of Moldova, through the transition from the initial offering only fixed telephony services to the latest generation services such as 3G + mobile telephony services, mobile Internet with speed up to 175 Mbps in 4G + network, Internet Broadband speed up to 1 Gbps per second, Digital TV with interactive functions, now available also on smartphone, tablet and laptop through Multiscreen service. For years, Moldtelecom maintains its leading position in the market for Internet Broadband services, fixed telephony, mobile Internet and is revolutionizing the Digital Television services market with new service launches, thus permanently contributing to the development of the country's electronic communications sector and economy. Moldtelecom became the largest electronic communications Corporation in Moldova and first-ever operator, to deliver internet services to everyone. Today Moldtelecom is the number one operator on the internet and data transport market. Our main goal is to power up societies with the most state-of-the-art technology at the fastest speeds, delivering actual value to each subscriber.

# ORANGE

Orange Moldova is part of the Orange Group, an international leader in the telecommunications services. In Moldova, the company had started its activity in 1998 under the Voxtel brand. 9 years later, on the 27th of April, Voxtel became Orange Moldova. Historically present on the mobile segment, Orange launched its fixed and convergent offers in 2017, following the acquisition of SUN Communications, Moldova's main cable operator. Today, the company is the number one telco operator in Moldova, with 41.3% of total telecom market value and 61.8% value share on mobile in 2020. Orange Moldova is also an important player in Moldovan economy, contributing with ~1.6% to country GDP in 2020. For the 7th consecutive year, Orange Moldova received the "Top employer" distinction, reconfirming the responsibility toward company's employees. Today, with more than 1300 employees, of which about 500 are engaged in International partnerships, Orange Moldova is generating large numbers of new job opportunities in the country. Orange Systems, the IT HUB of Orange Moldova, is the 2nd biggest IT Employer in Moldova, a resident of the Moldova IT Park which provides innovative services and products both for customers on the international and on the local market. With more than 12 years of international experience and over 15 customers from Western Europe, Orange Systems is a leader in digital and robotics solutions.

The company's services can be accessed throughout the country through the distribution network. There are 23 direct stores/shops, 92 partner stores/shops, 4 mobile shops and about 8000 points of sales where you can buy PrePay cards and recharge your account - all of this is for a population of about 2,600,000 people. Also, customers can ask for advice over the phone, Orange is providing 24/24 hours assistance. The status of the company as a leader in innovation was confirmed by 2 world premieres: HD Voice and HD Voice International. Orange Moldova's status of socially responsible operator is confirmed by both CSR and philanthropy programs implemented via Orange Foundation. During 11 years, the Orange Moldova Foundation has delivered over 60 projects, in such key fields like digital inclusion and education, social aid, health & disabilities and culture, impacting the life of over 400,000 beneficiaries.

Implementing HD Voice and VoLTE Convergent services for the mass market and business customers etc.

## Partners of & Certifications:

In 2009, Orange HD voice has won the Global Mobile Awards competition, which takes place at the most prestigious annual telecommunications event – Mobile World Congress. The Best Mobile Technology Breakthrough award was given for significant improvements in sound quality in mobile telephony, by implementing the world's first HD voice in Moldova, Orange becoming the first mobile operator in the country to win an international award of this size. In 2013, the GSM Association (GSMA) awarded the Moldovan government the "Best mGovernment" trophy for the best performance in the mobile communication sector, namely for the successful implementation of the m-signature project. The project was implemented in partnership with Orange Moldova. In 2014, Orange Moldova has received the confirmation of certification in 4 ISO standards. Thus, Orange Moldova is the first and only company in the telecommunication domain to hold 4 ISO certificates internationally accredited in the domains of quality management, environment, information security, and health and labor security. In 2015-2020, Orange Moldova was certified as Top Employer in Europe and in Moldova. This certification is only awarded to organizations managing to achieve the highest standards of excellence in employees' conditions. In August 2019 Orange Moldova was the first to launch VoLTE service in Moldova.

STARNET

StarNet, founded in 2003, is a privately-owned telecommunications company, one of the leading ITC organizations from Moldova. Since 2014, StarNet comprises a group of 5 profiled companies, organized as a holding. Taking into consideration the fast development of the technology, the company continuously attempts to keep the pace of the hi-tech evolution by integrating new equipment and providing quality customer service. During 16 years of existence, StarNet has managed to become one of the most popular and respected brands in Moldova, being highly appreciated by both experts and clients for the ability to meet the needs of its customers and for implementing new technologies in the field. StarNet is a company that focuses on creating the basis of the future, in which everyone could benefit from modern technologies that improve life at good prices and quality services. One of the company's primary goals is to provide integrated solutions for everybody, which is why it continuously improves its services. StarNet has its own fiber-optic network – the only company to have developed a fiber-optic network of such complexity in Moldova – and started to expand from the capital city to the entire country, now being present in 28 cities, covering households and businesses from North to South, West, and East of Moldova.

PRICewaterhouseCOOPERS

PricewaterhouseCoopers (trading as PwC) is a multinational professional services network of firms operating as partnerships under the PwC brand. PwC provides audit, consulting, accounting and tax services around the world and is considered one of the Big Four accounting firms. More than 276,000 people in more than 157 countries are committed to delivering quality in assurance, advisory and tax services, by working collaboratively using connected thinking to develop fresh perspectives and practical advice. For more than 20 years PwC has been serving its clients in Moldova. We take great pride in our capability to think global and act local for your long-term success.

This is achieved through a combination of domestic expertise - represented by local staff having relevant experience, and international knowledge - obtained from a diversity of professionals in different jurisdictions who are part of our firm. PwC Moldova provides full range of Tax and Legal, Advisory and Assurance Services. Our team comprises the largest tax, legal and advisory practice in Moldova, well suited to solve the complex issues you may face.

**General:**  
Assurance Services; Tax; Legal and Business consulting; ATIC Member.

**Technologies:**  
Our teams are in permanent process of embracing new technology solutions to bring more added value to the clients.

**Industries:**  
All

**Markets:**  
Moldova, Worldwide

**Services:**  
Assurance Services;  
Advisory Services;  
Tax Services;  
Legal Services;  
Human resource consulting.

**Partners of & Certifications:**  
Our team members hold audit licenses issued by the Moldovan authorities, as well as international qualifications such as ACCA and ADIT.

**Clients:**  
Major national and multinational companies

Products:

PwC Moldova is actively involved in assistance to the IT industry in Moldova and has been involved in multiple projects, such as:

- Assistance provided to ATIC in official correspondence with the Moldovan competent State authorities (i.e. The Ministry of Information Technology and Communications, Ministry of Finance, Ministry of Economy and State Chancellery), international donors (International Monetary Fund) and business associations (Foreign Investors Association, American Chamber of Commerce in Moldova) referring to the possibility of considering the IT Incentives under Medium term expenditure framework.
- Analysis of IT incentives applicable in other countries of the CEE region, as well as analysis of the impact of fiscal policies on the IT&C sector, referring to macroeconomic and social issues, as well as on the development of the companies.
- Assistance provided to the Ministry of Information Technologies and Communication in performing the regulatory impact assessment of the draft law on information technology industry and supporting the MITC in the follow up process - approval, public consultations, Government approval and adoption by the Parliament. PwC Moldova is also proud of the long-lasting collaboration with the UK Government on the reform assistance projects to Moldova. PwC UK together with PwC Moldova and PwC Romania were working closely with the British Embassy Chisinau, manage the UK-Moldova Reform Assistance program. Among the beneficiaries are the Government and various ministries, Prime Minister's Office, the Parliament, the National Bank of Moldova and various governmental agencies and regulators
