About UN Women Moldova for Ukrainian Refugees

According to UN Women survey data, about 60% of the Ukrainian refugees were employed before fleeing Ukraine. Almost 40% of all refugees expressed willingness to start searching

for a job and 3% have started working in Moldova. Having to provide for their families in the absence of men and with scarcity of childcare support options, refugee women's care burden has/is expected to increase significantly in Moldova. Despite the available conditional and unconditional cash assistance which helps stabilize family's livelihood conditions, improve health condition, education enrolment and wellbeing status for all members of the household, increase women's resilience, and protect them and families from resorting to negative coping mechanisms i.e., drug use, school dropout etc.

Based on comprehensive mapping of existing programmes, capacities and needs of refugees and vulnerable categories of women in regions, UNWomen in partnership with ATIC and other partners, identified educational opportunities: recognizing/certifying skills, reskilling persons and labour (self)employment opportunities, as well as provide support to women refugees subsidizing childcare support, aimed at integration of refugees in Moldova.

About the UNICEF Humanitarian Programme for Ukrainian and Moldovan children through EDU Tech Labs (Digital Labs)

As of early April, nearly 4.3 million refugees have crossed from Ukraine into Europe. About which 399,039 reached Moldova. Over 2 million refugees are estimated to be children, many separated or unaccompanied, about of which over 91,000 children, many with disabilities, were in institutional care in Ukraine. All are vulnerable and at risk of violence, trafficking, sexual and labour exploitation and abuse. Preventing family separation, ensuring immediate identification, and supporting reunification registration and safe spaces embedded in national child protection systems are urgent priorities.

Besides the key needs which include access to basic supplies, protection and care arrangements for unaccompanied and separated children (UASC), support to children with disabilities, health care services, including mental health and psychosocial support (MHPSS), and social protection, continued education is crucial.

The Digital Labs are envisaged as digital hubs where Ukrainian children connect to online learning platforms of the Ukrainian Ministry of Education or facilitate their inclusion into the Moldovan national education system. These labs will be also used as safe learning spaces for bridging Romanian language classes, catch-up classes, and joint STEM skills as well as digital learning sessions. These safe learning spaces will be open to both Moldovan and Ukrainian children and youth for interactive and informal education activities to support their social and emotional wellbeing and eventually aiming to strengthen and promote social cohesion.
